DYNAMO | Essentials

AKQUINET develops functional enhancements for Microsoft Dynamics 365 Business Central on premises (BC) and Microsoft Dynamics NAV under the product name **DYNAMO**.

Thanks to our many years of experience and frequent contact with Dynamics BC / NAV partners in Germany and Europe, we can offer high-quality ISV solutions that are suitable for use in many industries and oriented towards user requirements.

OUR **DYNAMO** products are the perfect addition to YOUR Microsoft Dynamics BC / NAV ERP solution.

Simple and affordable.

Do you need help managing your bank transfers, and do you want to integrate your electronic bank statements into BC / NAV processing?

With the application **DYNAMO | Payment Essentials**, you can generate bank transfer proposals that suit your deadline for customers and / or vendors. You can also create the SEPA files you need at the touch of a button.
If necessary, you can use the integrated check printing function instead. Standardized templates that you can adjust to suit your individual needs make your work easier.

You can use standardized interfaces to import electronic bank statements in the formats camt.053 and MT940 and then use this data for further payment processing.
Posting then takes place, meaning your bank accounting is always up to date.

You can get **DYNAMO | Payment Essentials** for free. All you need to pay is a small annual fee for updates.
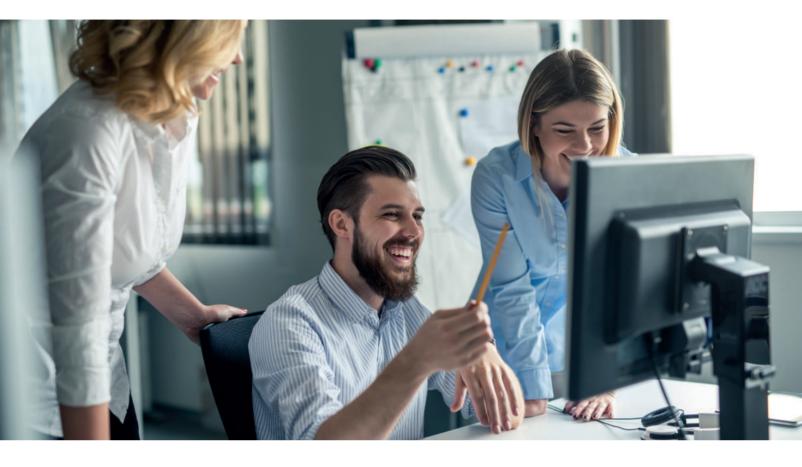

DYNAMO	Payment	ESSENTIALS

• Use defined templates / payment templates • Automated payment proposal • Transfers to vendors	• Transfers to customers • Check printing • Import and process bank statements, as camt.053/054 and MT940

Use the **DYNAMO | Payment Essentials** module as a fully integrated enancement for your standard BC / NAV. Available for Microsoft Dynamics Business central on premises and NAV 2016 and higher for Germany, Switzerland and Austria. For additional countries please contact us.

We continually extend and further develop the scope of services of our products by adding new ideas and addressing our users' and partners' requirements. Our close cooperation with Microsoft guarantees our solutions remain up to date.

We designed all of our **DYNAMO** products specifically for Microsoft Dynamics technologies. The manufacturer **certifies** them for the version in question.

Building on the standards of Dynamics BC / NAV, the **DYNAMO** team at AKQUINET creates integrated and certified solutions for finances, payment transactions, and card terminal connections.

You can integrate our products in many sectors individually, or you can combine them in your environment with little investment in the integration process.

Thanks to our partners, who have worked with us for many years, our modules have been licensed over 11,000 times in Germany and around the world.

Ask your partner or visit our website to find out more about integrating our products into your Microsoft Dynamics NAV solutions.
