akquinet

SAP WITH AKQUINET

Fit and secure into the digital future

The challenges facing companies today in the digitalization of SAP systems seem large and complex. But the opportunities to optimise your own competitiveness with state-of-the-art solutions are just as substantial.

We are at your side when it comes to modernising and expanding your SAP systems- from consulting to implementation to the operation of SAP systems and modules.

Rely on us: AKQUINET digitalizes your processes holistically.

SAP S/4HANA Transition

We can help you on your journey to SAP S/4HANA. Start now.

In 2027, SAP will stop supporting all legacy systems and focus entirely on SAP S/4HANA.
We work with you to determine the best path for your SAP systems, whether it is a greenfield or brownfield transition, a phased implementation, a rollout plan or the provision of SAP systems. For operations, we offer a range of cloud solutions. We can manage your systems and describe your processes.

- **Analysis of the current system landscape and, if applicable, the existing SAP licensing model**
- **Preparation of decision processes**
- **Fit-gap analysis and final process planning**
- **Implementation with SAP Activate**
- **Successful project completion**

Let us make your process map digital!

SAP Process Automation & Digitalization

More time to focus on your core business.

Speed up processes, eliminate errors, improve customer service - we are your partner in identifying your potential. Every business is unique and solutions need to be just as distinctive.

Our analysis helps you to consistently automate your SAP applications and processes. We use standard SAP technologies and akquinet bRobots®.

Intelligent workflows, digital processes for more success - this is what we are passionate about and what we know how to achieve.

Master Data Governance

Agile solutions for data-driven business.

Master data governance is critical to ensuring business efficiency and confidence in data quality. Especially for a successful S/4HANA transition, it makes sense to check, cleanse and standardise master data in advance.

We successfully implement master data management and governance processes for central master data worldwide.

Let us take your data to the next level.

SAP Security & Compliance Services

We secure your SAP systems holistically against cyber attacks.

84% of organisations expect the threat landscape to increase in 2023 compared to the previous year. A single security breach can have serious consequences for your business - we can prevent them.

We offer a range of software solutions, managed services, and consultancy from our SAP Security & Compliance experts.

Our goal is to protect your systems with real-time monitoring.

SAP Application Management

Put your SAP systems in safe hands.

We are a certified partner for SAP Managed Services and SAP HANA Operations Services. Put your SAP systems in safe hands with us. We offer you:

- ☑ **Change and release management**

- ☑ **Proactive maintenance for stable operations**

- ☑ **24/7 monitoring of your software with our monitoring systems**

- ☑ **Service level and key performance indicator (KPI) reporting**

- ☑ **2nd level support including coordination of operational processes**

Take advantage of our all-inclusive application management package.

Business Consulting

Management Sparring and Business Process Consulting

Even those who are successful in the market and in competition need a 'sparring partner' to provide new impulses from time to time to remain dynamic. In addition, technology needs to be adapted to developments.

This is where we can help managers. In discussions, we identify current challenges, analyse existing processes and systems, and work with you to set the course for the future.

We advise you holistically for optimal business processes.

Housing, co-location, hosting & cloud solutions

Your data in our certified data centres.

AKQUINET operates four high-performance, secure and sustainable data centres. The Twin Data Centre complies with TÜViT TSI 4.1 and EN 50600 standards.

State-of-the-art technology guarantees customisable outsourcing solutions with fail-safe and cost-effective operation. Whether housing, various cloud services, hybrid solutions, hosting or complete system operation - our qualified staff meet all requirements with the highest security standards. On-premise option, AKQUINET private cloud, public cloud (AWS) or hybrid option!

Join us in the cloud? We know the way.

SAP analytics RFC

Your cockpit for social economy and health care

Our analytics RFC management cockpit provides organisations with a clear analysis and reporting tool that not only supports refinancing, but also provides ongoing support for efficient corporate management. Planning can be based on AI-supported predictive analytics.

- ✓ **Simple and supply-related overview of your financial resources**

- ✓ **Complex becomes systematic - refinancing basis fully transparent**

- ✓ **Multi-system solution without interface losses**

Comments from our customers

„AKQUINET is the first choice for us because the company has competence and experience in the SAP environment and knows our industry environment."

UWE UFER, Commercial Director of Diakonie Michaelshoven.

"With AKQUINET we have created a solid basis for our further growth in a very short time. We are now in a position to quickly and securely connect additional practices and practice groups without having to change the IT landscape on site or deal with interface issues. We have an up-to-date overview of our business development, which is essential for our rapid growth."

DR ALEXANDER TKOTZ, Head of Business Development and Integration Management, Ober Scharrer Gruppe (OSG)
