

Port consulting and solutions

We digitalize your port logistics by turning your processes into integrated IT solutions.

Keep pace with the latest challenges in logistics. Digitisation and data integration are today's trendsetters. Don't wait. Act today.

AKQUINET PORT CONSULTING guides you to the winning side. We support you boosting your productivity, reduce costs levels and tune the operations. Checking your terminal's efficiency, monitoring your processes and enhancing your terminal operating systems (TOS). Our CHESSCON suite is a powerful solution that provides you with vital data driving your decision making process and supporting your container terminal and port operations. Enable your staff by using our most modern training scenarios. Give your management the bigger picture with our visualisation tools and make data actually visible. Seek and manage bottlenecks in operation before they occur. Don't let them disturb your operations.

Don't accept breaches in your data flow. Not now. Not in future. Let us help to check your systems integration and bring it to an unmatched level.

Advantages:

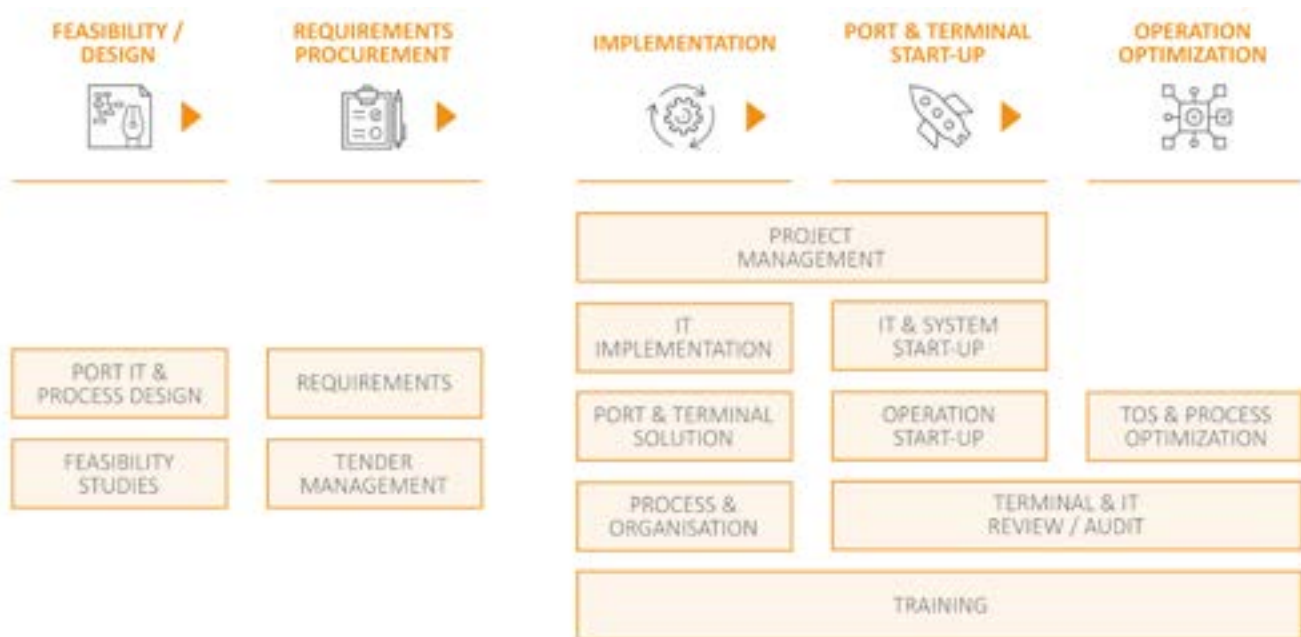

- A team of experienced experts familiar with solving IT and process challenges
- Broad know-how in industry process, IT solutions and port organisation
- We combine broad know-how in port and terminal processes and IT solutions
- Our team combines solid operations knowhow with IT solutions, automation approaches and implementation skills
- We develop concepts with you and implement them together making a change for better results

Operational processes and the IT solutions will become an integrated part of the company offering in the future.

No matter if your project is a "greenfield" or an operational terminal: join us for a newly design of your processes towards data driven integration and seamless IT support. Get a digitalised container terminal with all systems integrated and customised to your demands. We provide up-to-date simulation and emulation tools with our CHESSCON application suit to optimize your terminal design and boost your TOS performance.

Our experienced port consulting team supports you to enhance your terminal design, your processes and your IT-structure. We also provide latest 3D visualisation techniques to provide your staff a broader view in all stages of operations: prevent bottlenecks in your shift planning before they might occur. Save equipment cost, runtimes and personnel deployment.
