

# Easy fast and safe through customs

Automate customs registration in CargoWise One

## Using CargoWise2Customs we connect your CargoWise One with Advantage Customs.

Customizing declarations from CargoWise One is almost impossible!

- Customs-relevant data must first be recorded in CargoWise One and then again in an ATLAS-certified customs software in order to report to ATLAS
  - Duplicate data collection means not only increased effort, but also a high risk of inconsistent data between systems.
- ➔ A fully integrated customs interface in CargoWise One is missing to support the customs declaration process in a lean and efficient way

CargoWise2Customs provides you with an efficient and transparent customs declaration process thanks to a high level of automation! With CargoWise2Customs we connect your CargoWise One with the ATLAS-certified customs software Advantage Customs.

Data that you have already entered into CargoWise One that is required for a customs declaration is sent to Advantage Customs. After successfully submitting the customs declaration to ATLAS, status information, customs documents, delivery data, etc. are automatically sent back to CargoWise One and assigned to the respective shipment.

Double data entry is no longer required and you benefit from an efficient and automated customs declaration process!

## This is how it works:

Shipments are recorded in CargoWise One. The customs-relevant data of the shipment are retrieved by CargoWise2Customs and sent to Advantage Customs. In Advantage Customs, you can back up this data, if necessary, with custom-level detail information. The integration of master data, templates and automatism in Advantage Customs significantly reduces the effort required for manual data collection.

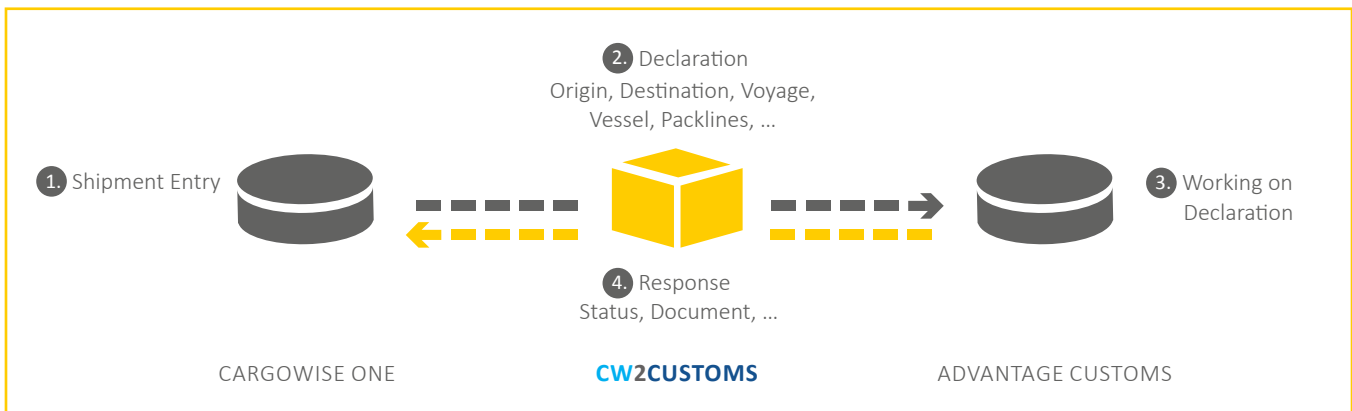

The following customs declarations can be mapped with CargoWise2Customs:

- Individual customs declarations for transfer into free circulation or customs warehouse
- NCTS Transit declarations
- AES operations

Transfer the final ATLAS customs declaration from Advantage Customs. Status data on the processing state, such as the transfer and receipt of the tax assessment, are reported back to CargoWise One, including the documents, and assigned automatically to the respective consignment.

## Your Advantages:

- **Automated transmission of customs-related data**
- **High degree of automation of your entire customs declaration process**
- **Significant reduction of manual effort**
- **Minimize the risk of erroneous / inconsistent data**
- **Own configuration possible**

## Our expertise:

As the largest certified WiseService Gold Partner in continental Europe, we help our globally operating customers to use and utilize CargoWise One optimally and to extend the system by useful components. Deep industry and system know-how are the basis for the successful consulting and implementation of

CargoWise One for our customers and us. This also applies to our application support and trainings. Our employees have many years of industry, international project and operational experience with CargoWise One as well as the development of apposite solutions. We are happy to advise you.
